Questions (10)

1 - True or false

A chromosome is a genotype. Is that correct?

30 sec

True

False

2 - True or false

Does evolutionary Strategy take only mutation operator?

20 sec

True

False

3 - True or false

Genetic programming's individuals are trees?

20 sec

True

False

4 - True or false

The gene of ONLY fittest individuals will survive in the next generations

30 sec

True

False

5 - True or false

A sequence of alphabets of length 10 is a valid chromosome?

20 sec

True

False

6 - True or false

Does a math expression have its equivalent tree representation?

20 sec

True

False

7 - True or false

Exploration is important than Exploitation?

20 sec

True

False

8 - True or false

Genetic algorithms are problem agnostic?

20 sec

True

False

9 - True or false

Can evolutionary algorithms solve combinatorial optimization?

20 sec

True

False

10 - True or false

An evolutionary algorithm can produce unexpected results

20 sec

True

False
